

AN INTRODUCTION TO THE RACIAL AND JEWISH PROBLEM

At the present the masses of common people have been misled, deceived, blinded, confused, put to sleep, and kept in ignorance to knowledge and problems that are absolutely vital to human existence. Here I will attempt to introduce people to the problems of race and the Jews by summarizing major ideas and guiding the reader to further information. I hope that I will not be rejected at the outset out of rashness and prejudice, as is often the case when one attempts to bring the Truth to others.

Many readers who come across this who are not of the White Race may be turned away and reject it, yet I must declare that the importance of race and the reality of Jewish power is absolutely necessary for everyone to know, Whites and non-Whites. But it should be known that I am specifically directing this work towards Whites.

I will start by explaining natural law, since it is a necessary prerequisite knowledge to understand race.

NATURAL LAW

One may ask: what is natural law? How can we discern what the Laws of Nature are?

The laws of nature are discovered through observation of the workings of the natural world (or the universe). Scientists are people we often turn to in order to understand natural law. It should be realized, however, that we do not necessarily need a scientific professional to reach this understanding, it can be done by anyone who observes nature, how things work, and is able to make a logical conclusion about them.

Perhaps a simple explanation of what the laws of nature are is provided by the English biologist and anthropologist Thomas H. Huxley in his 1868 lecture, "A Liberal Education":

"The chess-board is the world, the pieces are the phenomena of the universe, the rules of the game are what we call the laws of Nature. The player on the other side is hidden from us. We know that his play is always fair, just and patient. But also we know, to our cost, that he never overlooks a mistake, or makes the smallest allowance for ignorance. To the man who plays well, the highest stakes are paid, with that sort of overflowing generosity with which the strong shows delight in strength. And one who plays ill is checkmated--without haste, but without remorse."

The laws of Nature, as reason and science reveal, are laws which govern life and the universe and unalterably apply to all.

An example of natural law can be found in Natural Selection, the principle which the famous scientist Charles Darwin defined as a key force in evolution (from Darwin's *On the Origin of Species*):

"Owing to this struggle for life, any variation, however slight and from whatever cause

proceeding, if it be in any degree profitable to an individual of any species, in its infinitely complex relations to other organic beings and to external nature, will tend to the preservation of that individual, and will generally be inherited by its offspring. The offspring, also, will thus have a better chance of surviving, for, of the many individuals of any species which are periodically born, but a small number can survive. I have called this principle, by which each slight variation, if useful, is preserved, by the term of Natural Selection, in order to mark its relation to man's power of selection. We have seen that man by selection can certainly produce great results, and can adapt organic beings to his own uses, through the accumulation of slight but useful variations, given to him by the hand of Nature. But Natural Selection, as we shall hereafter see, is a power incessantly ready for action, and is as immeasurably superior to man's feeble efforts, as the works of Nature are to those of Art.”

Here is another quote from the same work to further that description:

“Each organic being is striving to increase in a geometrical ratio . . . each at some period of its life, during some season of the year, during each generation or at intervals, has to struggle for life and to suffer great destruction . . . The vigorous, the healthy, and the happy survive and multiply.”

Darwin concludes the following about natural selection and evolution:

“Thus, from the war of nature, from famine and death, the most exalted object which we are capable of conceiving, namely, the production of the higher animals, directly follows. There is grandeur in this view of life, with its several powers, having been originally breathed by the Creator into a few forms or into one; and that, whilst this planet has gone cycling on according to the fixed law of gravity, from so simple a beginning endless forms most beautiful and most wonderful have been, and are being evolved.”

Evolution is a reality and this can be seen from the fossil record which has been discovered. One may distinguish between microevolution (evolution within a species, which has actually been observed in action today by scientists) and macroevolution (which means the full-scale change of one species to another) and point out that it is unlikely that environmental forces, natural selection, and random genetic mutations alone have developed all of the unique and complex species. It may be possible that some spiritual force is behind macroevolution, or maybe some key information is missing. Nonetheless, scientific studies, especially on evolution, have revealed Nature's Laws which apply to all things, including humans.

RACE

The ideology of Liberalism (here we do not refer to the economic idea of classical liberalism, but the modern liberalism which dominates the United States of America today), connected with and rooted in Marxism, has become dominant among much of the world and denies the reality of race. People can recognize that there are differences between individuals and between species, but are forcefully taught since childhood that there are no differences between races besides color. They can recognize that there is individual nature and overall human nature, but they are

denied the right to recognize racial nature.

The truth is that race is real and is much more than skin color; there are differences between races, mentally as well as physically. Different races have different skull shapes, facial features, skeletal features, and other physiological differences. They are different psychologically, behaviorally, intuitively, and produce generally different types of cultures, religions, and morals (although they sometimes have similarities, they are still different). In the 19th and early 20th Centuries, anthropologists such as Charles Darwin, Thomas Huxley, Lothrop Stoddard, and Madison Grant have shown the differences between races and their importance. In the later 20th and early 21st Centuries they are still revealed by suppressed scientists such as Arthur R. Jensen, J. Phillippe Rushton, Earnest Albert Hooton, Glayde Whitney, George W. Critz, and William Shockley.

Miscegenation destroys a race, its character, soul, and features, and produces mongrels with genetic incompatibilities and who, due to their mixture, have a psychological disharmony. The crossing of races destroys the uniqueness of a race, its abilities and soul; it irreversibly annihilates all this, resulting in mongrels that ultimately will not produce the same culture and will not express themselves as the two original races which they are the result of had once been able to do (prior to mixing). Extensive miscegenation among human races is usually a violation of natural law, as scientific study reveals. Honest historical and scientific study discloses that all races instinctually and naturally do not want to mix and have the desire to keep themselves separate from other races. They mix only when they live together in a multiracial environment for a long time (particularly in urbanized civilizations, in which people's connection to Nature is severed), and the result is not desirable.

Most Whites who question the idea that all races are the same or express the view that their own race should be preserved, are irrationally defamed and dismissed as "racists", "bigots", "white supremacists", etc. The culturally and ethnically destructive Liberalism is today popular and race-mixing is promoted because of a specific international, interconnected group that has grown powerful in modern times.

JEWS

The Jews today have deceived the Gentile masses of all races that they (Jews) are a mostly innocent, wandering religious group that has been unfairly persecuted for thousands of years. They have always hidden the fact that they view themselves as a race-nation, what they believe about Gentiles, and what their intentions are concerning Gentiles. The Jewish people are a cohesive ethnicity united against all Gentiles, who they see as sub-humans. Jews attempt to hide the fact that they have dualistic ethics in which Gentiles are viewed as lesser beings to which they have little moral obligation, while Jews themselves are viewed as a special "Chosen People" and must receive good treatment. They attempt to conceal the true teachings of their Torah, their Talmud, and their modern ethnic supremacism which they are being taught in Israel and elsewhere in the world. They convince ignorant Gentiles that the Jewish history of genocides and other sorts of crimes done by Jews, documented in the Torah, are not representative of their nature.

What needs to be known is that more recently, in Europe and North America, since Colonial times and especially since the Industrial Revolution, Jews have infiltrated Gentile governments, they have taken over economic and financial positions, and they have achieved control over the majority of the mass media (cinema, newspapers, television, magazines, book publishers, recording industry, etc.), through which they spread propaganda and shape the minds and cultures of many Gentile nations. With this control over culture and thought, Jews have worked to spread both moral and scientific materialism, atheism, overt individualism, and other forms of culture-distortion.

In more modern times, their influence has spread even further, and they now have key economic positions even in China, India, and other nations. They manipulate governments through their money power, their banking (which started with the notable Rothschild banking dynasty), with which they bring nations into debt by a system of usury and loans. It is as Congressman McFadden put it in his 1934 address to Congress to expose the Federal Reserve, the powerful and Jew-owned central bank of the United States:

“The man who knows or suspects that a crime has been committed and who conceals and covers up that crime is an accessory to it. Mr. Speaker, it is a monstrous thing for this great nation of people to have its destinies presided over by a traitorous government board acting in secret concert with international usurers. Every effort has been made by the Fed to conceal its powers - but the truth is - the Fed has usurped the Government. It controls everything here and it controls all of our foreign relations. It makes and breaks governments at will.”

(McFadden’s observations apply to other nations as well.)

The Jewish elite, which holds much control over the masses of partially or mostly ignorant (although obedient and easily manipulated) common Jews, aim for more and more power. A notable attempt to achieve total Jewish dominance is their role in Communist revolutions or attempted revolutions. The Communist idea was founded by Karl Marx, a man of Jewish descent, and Communist movements, most notably the Bolshevik revolutionaries, were led largely by Jews (it also important to note that Jewish international bankers such as Jacob Schiff instigated and financed the Bolsheviks). The Holocaust is used by the Jewish media to keep Gentiles sympathetic and unsuspecting. While the evidence cannot be presented here, all must know that the Holocaust has been proven to have never occurred by researchers such as Thies Christopherson, Paul Rassinier, A.J. App, Richard E. Harwood, Arthur Butz, Fred Leuchter, Germar Rudolf, and many others.

From the Ancient Egyptians to Ancient Romans to Medieval Christians to Spanish Inquisitors to Tsarist Russians to Romanian Legionaries (“Iron Guard”) to German National Socialists (“Nazis”), Gentile peoples have learned of the Jewish character and manipulation, and took actions against the Jewish people. Unfortunately, the Jews have survived by turning Gentile against Gentile and deceiving millions. By the middle of the Twentieth Century, they have succeeded in enslaving much of the world, due to the fall of the Axis nations of World War Two. In the post-World War Two times, intellectuals such as Wilmot Robertson, William G. Simpson, Kevin MacDonald, and Tomislav Sunic have done extensive scholarly research to educate others about the racial and Jewish problems. From their studies there emerge, beyond any doubt, the

terrible plans and movements of the Jewish elite.

The Jews have planned and taken into action the aim to destroy Gentile cultures (morals, religions, art, etc.) and destroy the races by promoting large-scale miscegenation, which they had clearly begun by the early 1900s. The most significant part of this is their intention to specifically race-mix, to the point of non-existence, the White/Europid/Caucasian Race, which they also damage by decreasing reproduction, already significantly and purposely reduced by various forms of discouragement (this is why Whites currently make up only about 10% of the world's population). The Jewish elite believe that they can more easily manipulate the other races, especially once race-mixed and economically enslaved. To conclude, David Duke wrote in *Jewish Supremacism*, "... the ultimate triumph of Jewish Supremacism would mean the destruction of all heritages, nationalities and religions other than their own."

RECOMMENDED READING

The reader of this short work is probably very shocked and horrified, perhaps even repulsed, by what I have said and shown. But it was an absolute necessity that they be educated, for we are all in danger and will continue to decline if nothing is done. For more specific information and history on the subjects of race and the Jews, I recommend the following works:

[*My Awakening*](#) by David Duke *

[*Jewish Supremacism*](#) by David Duke

[*Homo Americanus*](#) by Tomislav Sunic **

[*Zionism and Russia*](#) by Valdas Anelauskas

[*For My Legionaries*](#) by Corneliu Zelea Codreanu

[*Bolshevism From Moses to Lenin*](#) by Dietrich Eckart

[*Which Way Western Man?*](#) by William G. Simpson

[*The Dispossessed Majority*](#) by Wilmot Robertson

[*Understanding Jewish Influence*](#) by Kevin MacDonald

[*Culture of Critique*](#) by Kevin MacDonald

[*Imperium*](#) by Francis Parker Yockey

[*"Kill the Best Gentiles!"*](#) by James von Brunn

* If the reader is not willing to read much, then I strongly recommend that he or she at least read's Duke's book.

** Unfortunately, Sunic's book is not available online. A good review of it is linked instead.
